Personal Information

Birthdate : 08.12.1992
Driver License : B
Military Status : Completed

Experiences

TelescopeLabs
Sr. Software
Developer
(09.2022 - Cont.)

I am working on the B/E team. My position details are about integrating systems and creating new services.

- I have integrated the block chains to the systems for analyzing.
- I have integrated a few third-party data warehouses. With that, we can execute a query with a data model or a SQL query.

Programming languages; .Net, NodeJS, KQL, SQL

Technologies; Azure Data Explorer, MySQL, Cosmos DB, BigQuery, Azure Storage, Azure Function Apps, Git, Azure DevOPS

Microsoft
Sr. Software
Developer
(02.2022 - 08.2023)

I worked on the Moderation team of Microsoft at as a Vendor. Here I am working on Python Services, HitApp applications, Dashboards with Kusto queries.

Programming languages; Python, HTML, CSS, JavaScript, KQL

Technologies; Microsoft Azure Machine Learning Studio, Azure Data Explorer, GIT, Azure DevOPS

Hotech
Software Developer
(06.2016 - 02.2022)

I have worked 3 positions.

Continuous Integration (02.2018-02.2022)

Integration development for the product we develop for hotels, to integrate with different devices (switchboard, door lock systems, ... etc) and channels (E-Invoice (Standard of UBL), Channel Manager, Data Transfer, ...), I worked on processes, post-development maintenance and informing the technical team.

In addition, I developed storage procedures, triggers, sp, view, and functions in the DB team. (Firebird)

Programming languages; .Net, Delphi, Java (Spring Boot)
Technologies; Web Service (REST, SOAP, Private XML), COMM, TCP, GIT
DataBases; Firebird, SQL Server(reading data), Oracle(reading data with limited access and editing private view)Integration development for the product we develop for hotels, to integrate with different devices (switchboard, door lock systems, ... etc) and channels (E-Invoice (Standard of UBL), Channel Manager, Data Transfer, ...), I worked on processes, post-development maintenance and informing the technical team. In addition, I developed storage procedures, triggers, sp, view, and functions in the DB team. (Firebird) Programming languages; C#, Delphi Technologies; Web Service(REST, SOAP, Private XML), COMM, TCP, GIT DataBases; Firebird, SQL Server(reading data), Oracle(reading data with limited access and editing private view)

Mobile Developer (11.2016 - 02.2018)

I developed mobile applications and unit/integration tests on android for hotels.

Programming languages; Java

Technologies: Android studio, Espresso, Git, JUnit, Android Espresso

Software Application Specialist (06.2016 - 11.2016)

I had the opportunity to manage Hotech's ERP applications, applications in hotels, preparing special/public Fast Reports, submitting the requests of the hotel in ERP to the development environment and putting them into use at the hotel after development.

There was only the Delphi Fast Report in terms of technology. Apart from that, I had the opportunity to develop myself in the field of CRM and Hospitality ERP.

Education

University : Fırat University - Software Engineer

High School : Ataturk Technical and Industrial Vocational - Network Systems
